

WHY CHOOSE IMPREGLON FLUOROPOLYMER THIN-BUILD COATINGS?

Impreglon Coatings is the sole provider of IMPREGLON® process coatings in Canada. IMPREGLON® coatings have become the thin-build standard for corrosion and deposition prevention in the Western Canadian oil and gas industry.

Impreglon Coatings offers its customer the following advantages:

- **Specialization** – Impreglon Coatings focuses solely on the application of fluoropolymer coatings for the production segment of the petroleum industry. Our people, equipment, and systems are dedicated exclusively to coating applications for this market. This gives us an in-depth understanding of our customer's needs and the industry and technical knowledge to meet those needs.
- **Proven process** – The Impreglon Coatings process uses state-of-the-art equipment, industry leading QA and business systems, and a fully traceable audit trail to provide you with the level of predictability and certainty that is unparalleled in the industry.
- **People** – Impreglon Coatings is owner-operated and senior management works directly with customers. We have involved leadership, world-class coating application specialists, and the most experienced customer service providers in the industry.
- **Track record** – Impreglon Coatings was the first fluoropolymer coater in Canada and introduced thin-build coatings to the oil and gas industry. We have provided over 30 years of service to the petroleum industry. Our investment, knowledge, and experience is second to none.
- **Limited guarantee** – While most applicators limit their guarantee to application alone, Impreglon Coatings guarantees performance. Our coatings will solve your problem or we will refund your money.
- **Capacity & capability** – With the ability to process individual parts weighing up to three tons and measuring up to 35 feet in length, Impreglon Coatings has capacities that exceed those of any other North American thin-build coater.
